FLASHCARDS

BASIC FLASHCARD GAME

Print out these flash cards and cut them down to size. It is a good idea to laminate the cards to protect them from damage so you will get maximum use out of them!

- Pick a Card - Choose one flashcard from the stack.
- Say the Word - Look at the picture or word on the card and say it out loud.
- Start in Gamilaraay – Always just try your best to say the Gamilaraay word first...
- Check Your Answer – Use the book to check your answer, or, save time and write the names on the back of the cards!
- Repeat - Go through the stack of cards several times to practice and remember!

Want to challenge yourself? - Try to use the word… do you remember how it was used in the book?

BASIC FINDING PAIRS GAME

Print and laminate two copies… and play a game of finding pairs!

- Set Up the Cards - Lay all the cards face down on a flat surface in rows.
- Take Turns - Each player takes a turn to flip over two cards.
- Look for a Match…
  - Match? - If the two cards show the same picture it's a match! Keep the pair and take another turn.
  - No Match? - If the cards don't match, flip them back over and end your turn.
- Keep Playing - Continue taking turns until all the pairs are found.
- Count the Pairs - When all pairs are collected, count how many each player has. The person with the most pairs wins!

To embed language you could include a rule that you only get the points if you remember the pairs names!

Importantly! Have fun!
